

# Family Practitioner Service

**Our Family Practitioner Service provides 1:1 support to families facing difficult periods and challenges in their lives.**

We work in partnership with families and a range of professionals to provide focused support for the whole family, intervening as early as possible and preventing escalation to more intense and specialist services.

## We aim to achieve

- sustained positive change
- stop recurrence of issues
- give families strategies and coping mechanisms to deal with future challenges by themselves.
- create a network of friendship and support around families to reduce isolation and link families into local services as part of that network.

*We enable families to reflect on their challenges, starting with their own perspective, looking at where they want to be, and capturing the voice of the child.*
